How to Log In to CCSE Virtual Desktop

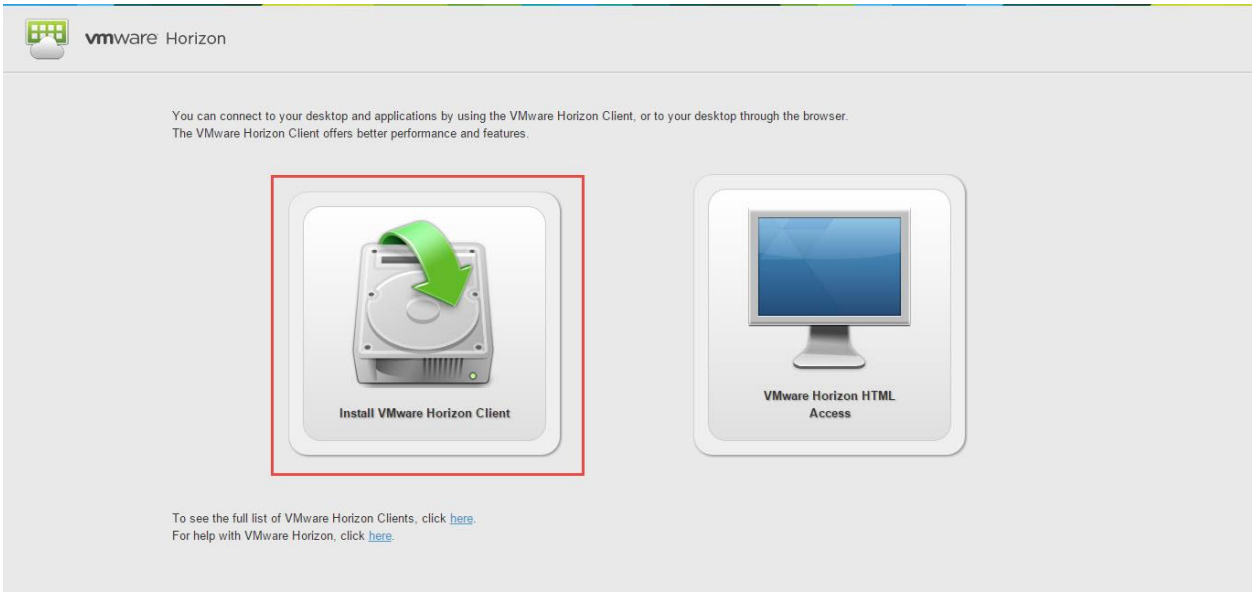
Purpose: This document will show how to download and install VMWare Horizon. Using this program, you will be able to log in to CCSE Virtual Desktop.

Needed: You will need:

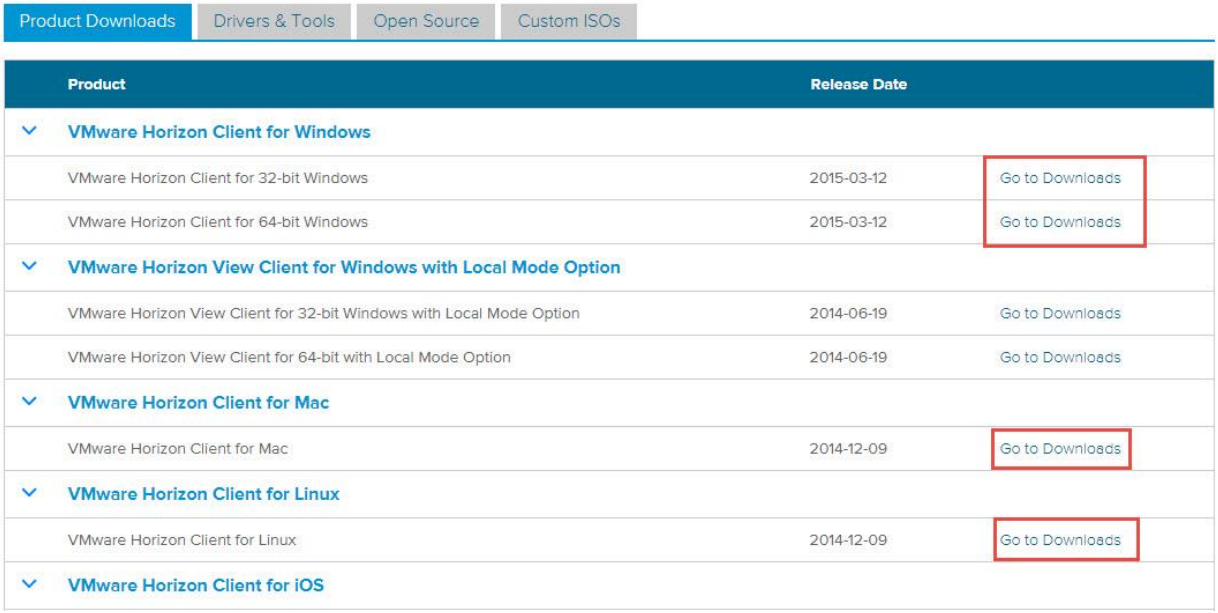
- Connection to Internet
- Web Browser
- KSU Netid and Password

Process:

1. Using your web browser, visit the web address https://cseview.kennesaw.edu/
2. From this page, download the VMWare Horizon Client.



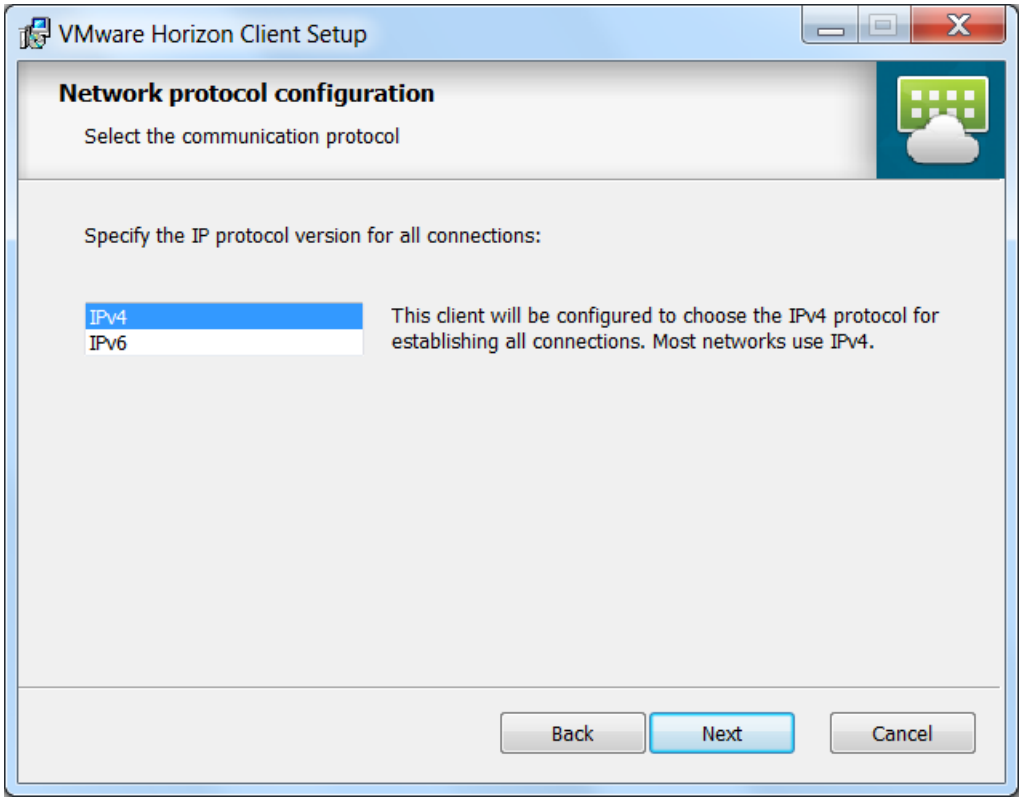
3. Select the client for your preferred operating system and click "Go To Downloads"



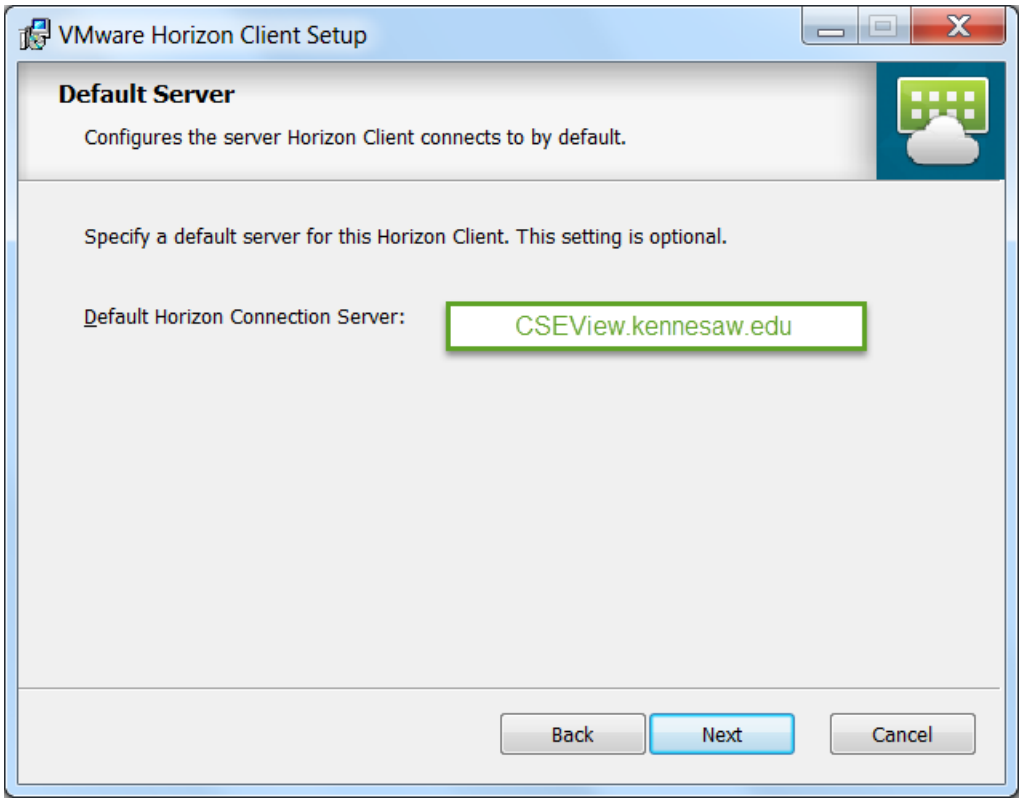
4. Download the client

5. Open the Setup and accept the terms and agreements.

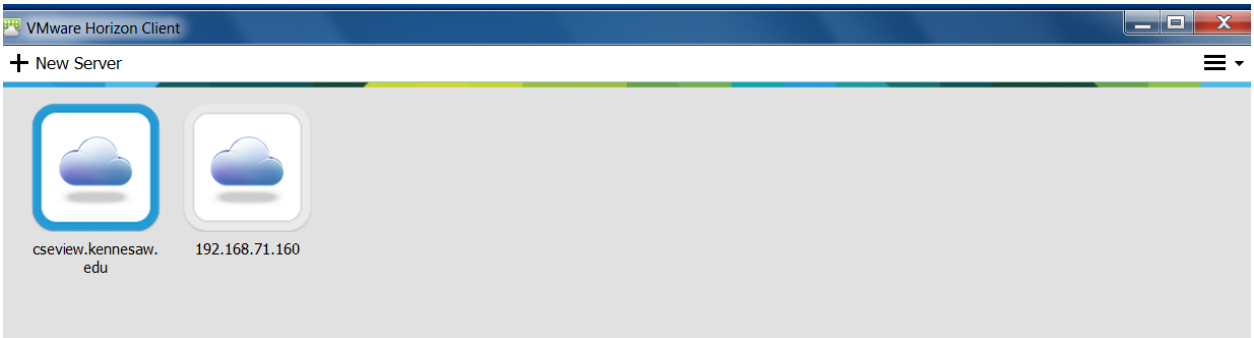
6. Select “IPv4” as the internet protocol and click “Next”



7. At the “Custom Setup” screen, leave the options as default and click next

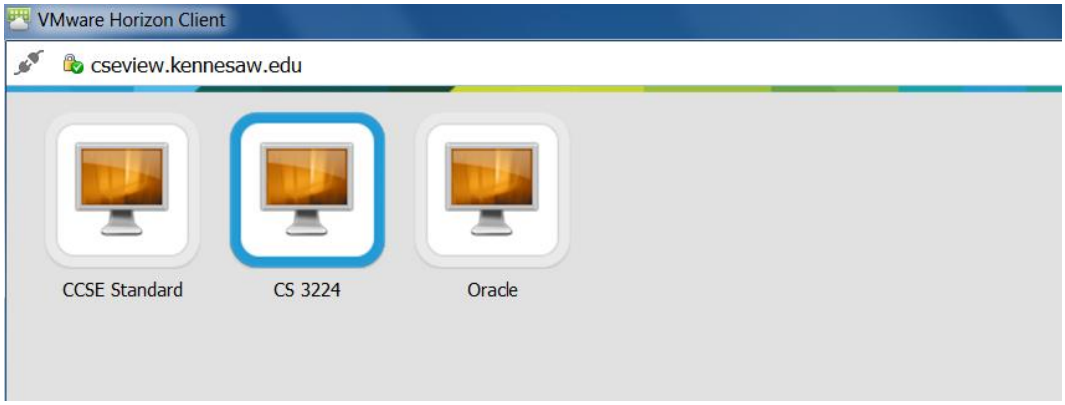


8. Replace the IP address with “cseview.kennesaw.edu”
9. Leave the current options selected and click next.
10. Choose where you want a shortcut to the VMWare Client
11. After the client has finished installing, restart your computer.
12. Once you have restarted your computer, open the client and select the server IP “cseview.kennesaw.edu”

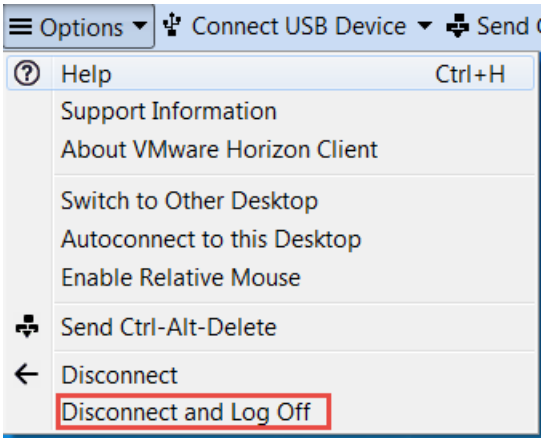


13. Once the server is connected, enter your KSU Netid and Password

14. Choose a VM (your teacher will specify which one to use)



15. When you are ready to disconnect, save your work to a USB drive or the P drive. Then select "Disconnect and Log Off"



FAQ: This program will let you use a virtual machine for your CCSE labs. A virtual machine lets you work on a virtual computer without changing anything on your actual device. You will automatically be disconnected after 5 hours. When saving work, save onto a USB drive. Do not save your work on the CCSE Standard virtual machine. Once you are logged out, any work saved on that VM will be deleted.
