

CS3503

# Computer Organization and Architecture

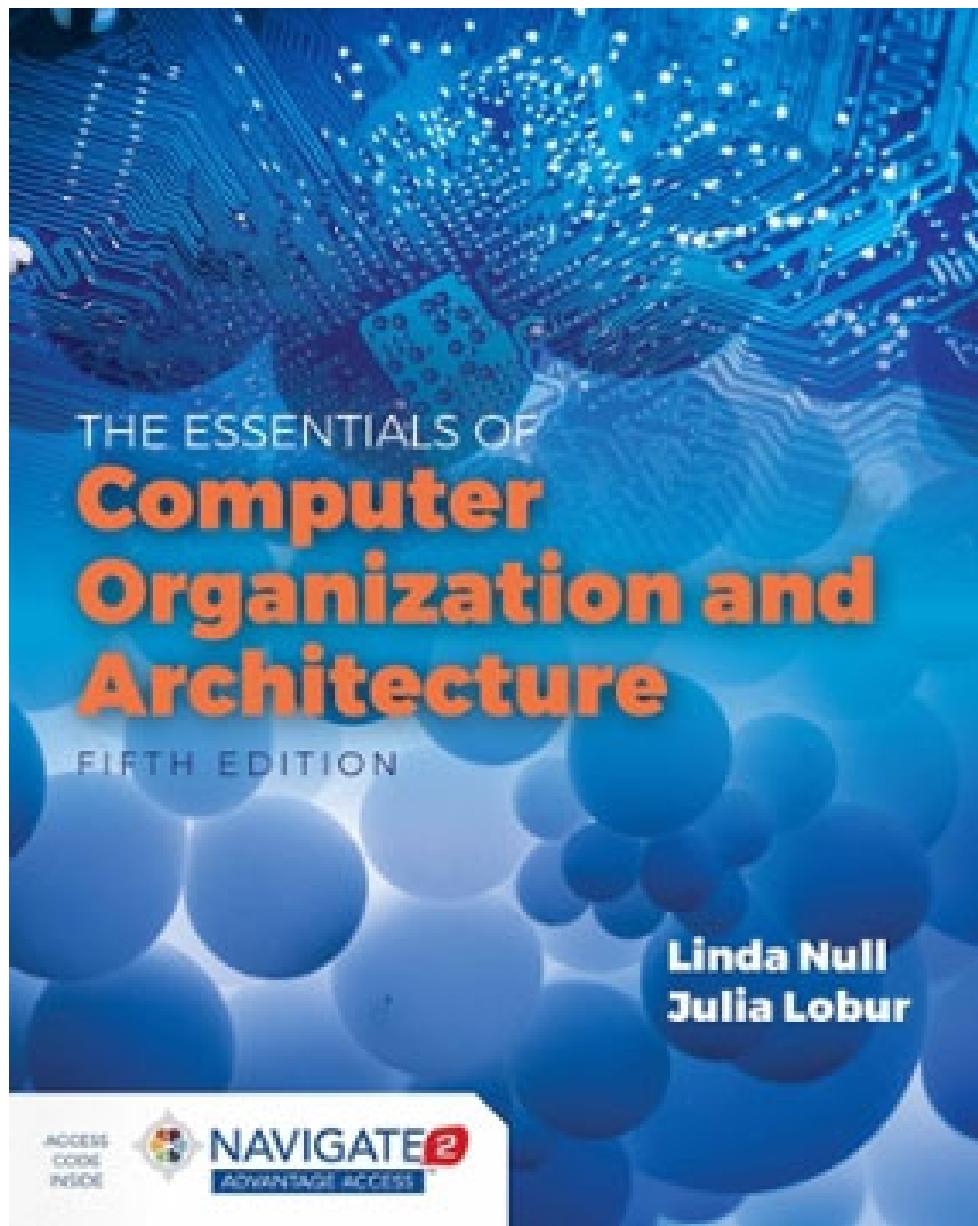

# Why we are here?

- **Understand** the working mechanism and some fundamental principles of computers
  - Because most of them are universally applied in computer science
- **Design** better programs, including system software such as compilers, operating systems, and device drivers.
  - Even **optimize** program behavior.
  - **Evaluate** computer system performance.

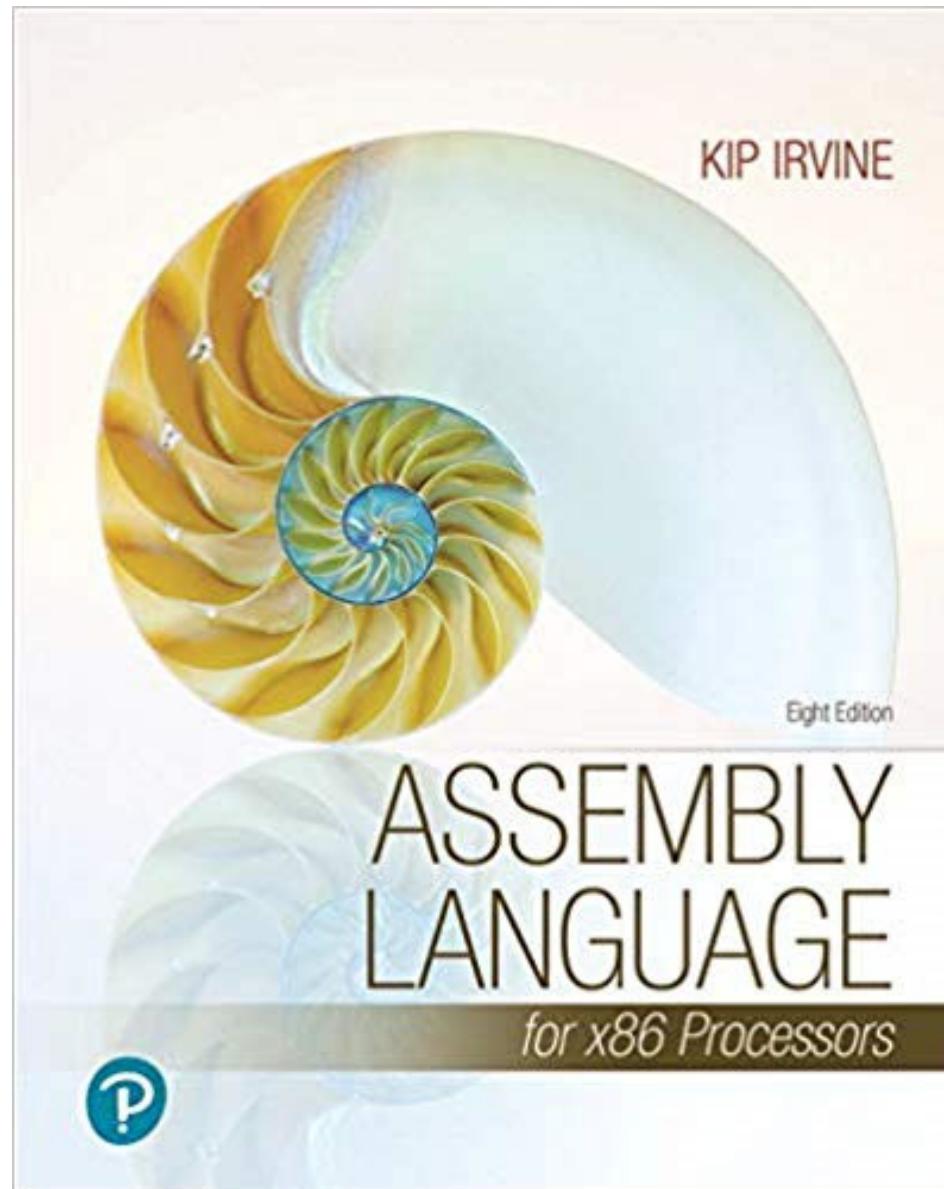

# Course Goal

- Give an **introduction** to computer architecture
  - Data representation: integer, floating-point etc.
  - Boolean algebra and digital logic
  - Hardware organization: CPU, memory, disk etc.
  - Assembly language
- Give a **preparation** for more advanced courses
  - Operating systems
  - Compiler, Programming Languages
  - Parallel & Distributed Computing

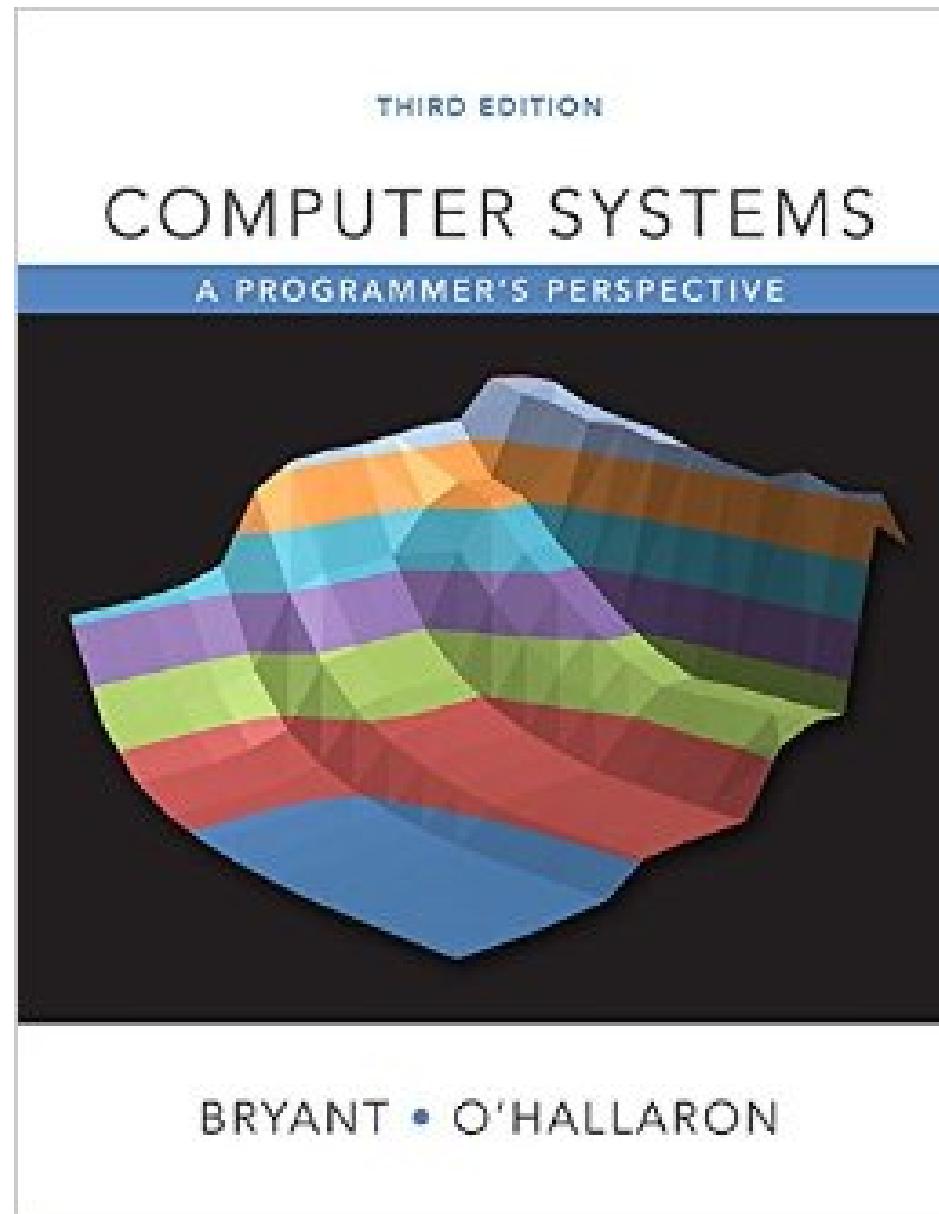

# Textbook

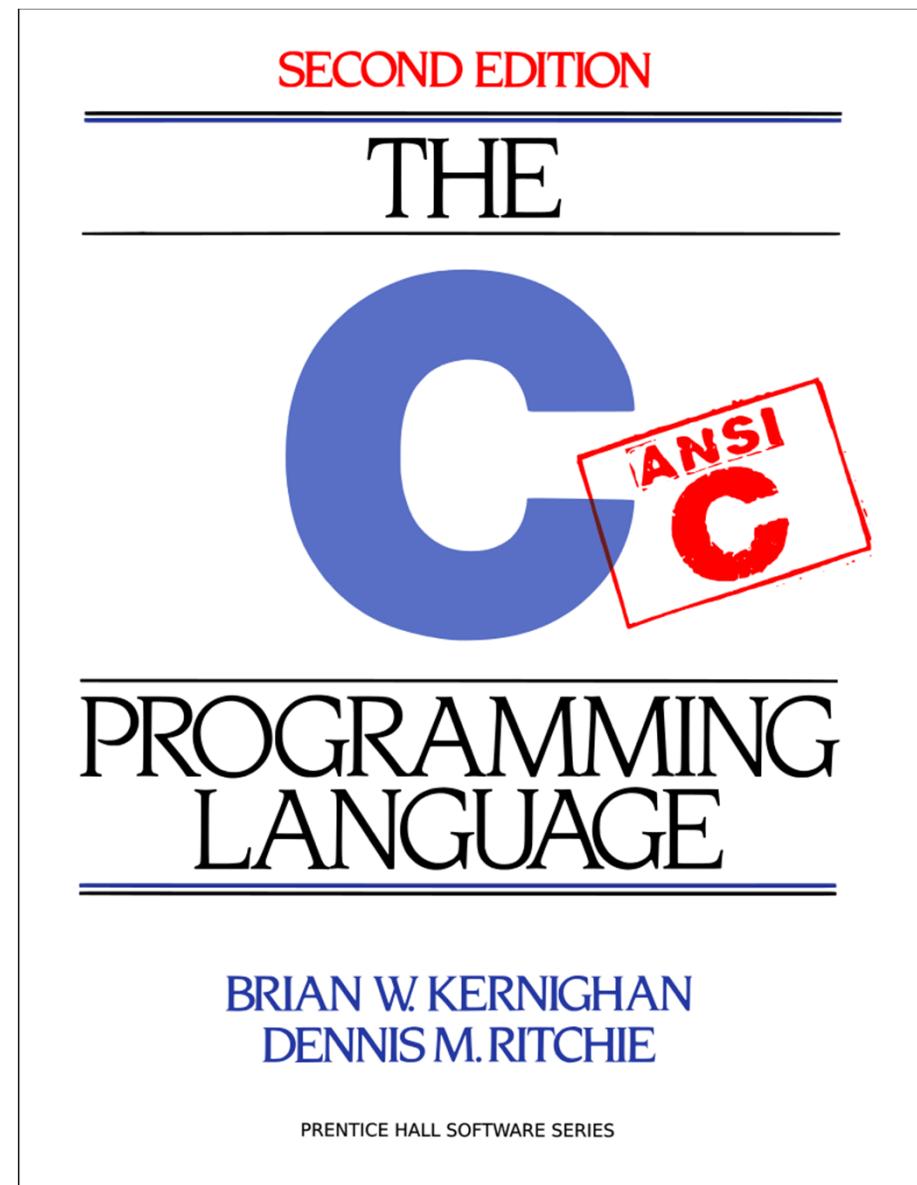

Textbook (not required but recommended  
for the best learning)

# Reference Books

# Reference Books

# Learning Methodology

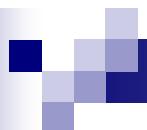

- Review course materials in time
- Understand course materials
- Work on all practice problem sets
- Practice! Practice! Practice!
- **Don't** wait until the last minute!

**This course takes time!!!**

# Different Methods

- Google (or Bing or other search tools)
- Books
- People

# I am here to help!

- I see students struggle each semester
- Most of them **never** ask questions or come to office hours
- I want to help you learn, but I cannot force you to learn
- Better ask for help than linger on and retake the course!

---

# **Student Success in CS-3503 COA**

**Waqas Majeed  
CS, CCSE, KSU**

# Accreditation Metrics

---

## ABET accreditation of KSU BS CS

- **SO 1.** An ability to apply knowledge of computing and mathematics appropriate to the programs student outcomes and discipline. > **LO2**
- **SO 2.** An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution. > **LO4**
- **SO 3.** An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs. > **LO3**

# CS Program Metrics

---

## □ CS-3503 in KSU BS CS Program

- **LO 1.** Represent data in various formats, and convert between decimal, binary, octal, hexadecimal, sign-magnitude, and ones- and two's-complement. Perform some basic binary arithmetic, multiplication and division. > **Ch2**
- **LO 2.** Use Boolean algebra mathematical expressions and k-maps to describe and manipulate the functions of simple combinational and sequential circuits. Design simple combinational and sequential logic circuits using gates and flip-flops. > **Ch3**
- **LO 3.** Describe and explain the organization of the classical von Neumann computer and its major functional units. Describe the functioning of a single cycle CPU and its internal operations. > **Chs 4&5**
- **LO 4.** Implement basic assembly-language programs. Explain different instruction formats, various addressing modes and how an instruction is executed. > **Ch8**
- **LO 5.** Design simple memory devices and system-level memories. > **Ch6**

# Learning Metrics

Activity	Grade Percentage
Attendance + Participation + Videos	2%
Quizzes (4 x 2%)	8%
Midterm Tests (4 x 10%)	40%
Lab Assignments (5 x 10%)	50%

## □ CS-3503 Computer Org. & Arch. (2024 Fall)

Week #	Date	TR (Q-207)	Due (Thursdays)
1	13-Aug	Syllabus & Course Intro, Introduction (chap1)	
2	20-Aug	Data Representation (chap2)	
3	27-Aug		Test-1 (Ch 2)
4	3-Sep	Boolean Algebra & Digital Logic (chap3)	
5	10-Sep		Test-2 (Ch 3)
6	17-Sep	MARIE: An introduction to a simplified computer (chap4)	
7	24-Sep	A closer look at instruction set architecture (chap5)	Lab-1 (MARIE Sim Analysis)
8	1-Oct	Memory (chap6)	
9	8-Oct	Input/output (chap7)	Lab-2 (Memory Design)
10	15-Oct (*F)	x86 Processors Assembly Language Programming (Module-8)	Lab-3 (Computer Design)
11	22-Oct (*F)		Test-3 (Chs 4, 5)
12	29-Oct	ARM Processors Programming (Module-9)	Lab-4 (x86 Programming)
13	5-Nov		Lab-5a (ARM Setup)
14	12-Nov		Lab-5b (ARM Programming)
15	19-Nov	Advanced Topics	Test-4 (Ch 6, Mod 8)
	26-Nov	Fall Break (Whole-week off)	
Last Class	2-Dec (M)	N/A	
Final Exams	3~9-Dec (T~M)	N/A	
Final Grades	12-Dec (R)	Due at Noon	

I hear, I know. I see, I remember. I do, I understand.

Confucius

Tell me and I forget. Teach me and I remember.

Involve me and I learn.

Benjamin Franklin

# Instruction Metrics

---

- Effectiveness and support in helping learn
  - Stop us; feel free to **ask questions** in class. Happy to answer!
  - Consult **me or the GTA** (multi-day, multiple office hours F2F/Teams).
- Creating learning environment
  - In-class **problem-solving**, and **self-practice** problems sets posted.
  - Small-grade quizzes; **ABET SO-** and CS Program **LO-based** tests.
  - Hands-on individual labs/project for **immersive learning/skills**.
  - Random attendance to promote **active learning** with **flexibility**.
  - Class-participation to encourage **interactive learning**.
- Contents' contribution to student knowledge and skills
  - Problem solving based tests/quizzes for **depth and breadth**.
  - Hands-on labs/project on **industry standard software & hardware**.

# CS-3503 COA Course Outlook

---

- Course Prerequisites (ideally)
  - High-level computer **programming**, Discrete Math., Data Structures
- Course Leads to:
  - **Core:** Operating Systems, Parallel & Distributed Computing, Embedded Systems, Real-time Operating Systems, High-performance Computing, Concepts of Programming Languages, Algorithms, DBs
  - **Electives:** AI, Machine Learning, Big-Data Analytics, Machine Vision, Deep Learning, Robotics, Cyber-/Software/System/Network Security, Compiler Design, System Software, Device Drivers & Firmware Design
- Jobs (\$70-150K per annum)
  - Systems Engineer, Device Driver Engineer, Firmware Engineer, Hardware Engineer, Software Engineer, Embedded Systems Engineer, HPC Engineer, ML/DL Engineer, Robotics Engineer to name a few.

I hear, I know. I see, I remember. I do, I understand.

Confucius

Tell me and I forget. Teach me and I remember.

Involve me and I learn.

Benjamin Franklin

# Student Success Tips

---

- **I respect and care about your success!**
  
- You've paid the tuition (just the start), need to **give time and effort now!**
  - How much Time: 2-3 hours per credit hour (see next slide) → **full workday outside class** for a course.
  - Effort: **Ask questions!**
    - **Attend** all classes, **review** the lecture slides prior and after class, **read** the textbook for deeper and better understanding, **prepare** your own **notes**, **complete and submit** all assignments on time.
    - **Consult GTA and instructor.** Try the best effort on the tests, labs, and project.
  
- **Take ownership** of your learning, success, and grade!

# How much time after class?

Microsoft Bing

college student workload per credit hour taken

SEARCH CHAT SCHOOL SHOPPING IMAGES VIDEOS MAPS NEWS MORE

About 1,510,000 results

Typically, for each credit hour, students can expect **about 2-3 hours** of homework or study time per week. So, a 3-credit course might require 6-9 hours of work outside of class each week.

Freshmen year: 0-30

Junior: 61-90

Sophomore: 31-60

Year in college: No. of credit points required

**COMPLETE guide to university credit hours in the U.S. [2024] - Stilt**  
stilt [www.stilt.com/blog/2022/02/what-are-credit-hours/](http://www.stilt.com/blog/2022/02/what-are-credit-hours/)

What kind of questions can you answer? How do I learn more? Can you teach me >

# Labs/Project

---

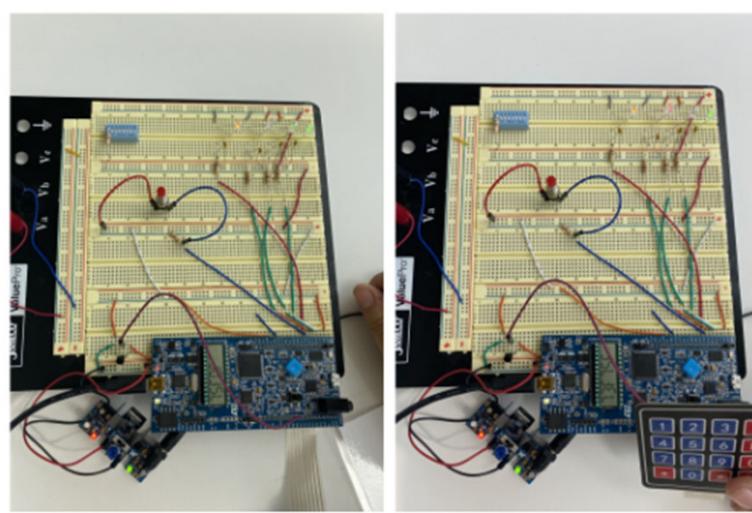

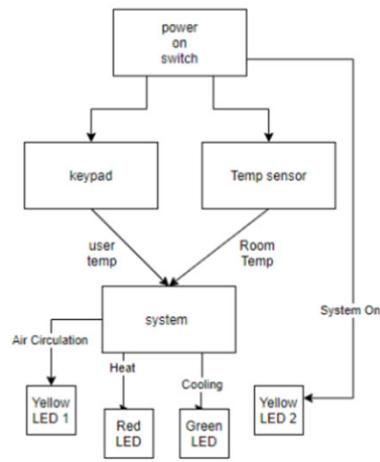

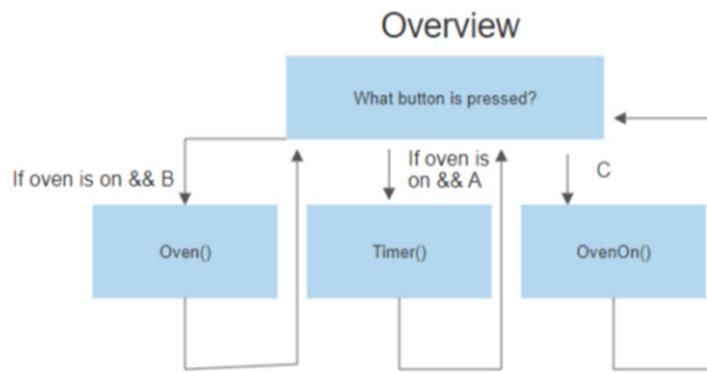

A screenshot of a web browser displaying the Arm Mbed website at <https://os.mbed.com/platforms/ST-Nucleo-F401RE/>. The page title is "Boards » NUCLEO-F401RE". The main content area features a large image of the NUCLEO-F401RE board, which is a blue printed circuit board with various components and connectors. A pink circular badge with the text "STM32 Nucleo" and a stylized logo is overlaid on the bottom right of the board image. The page has a dark header with the Arm Mbed logo and navigation links for Overview, Hardware, Code, Documentation, Case studies, and Community.

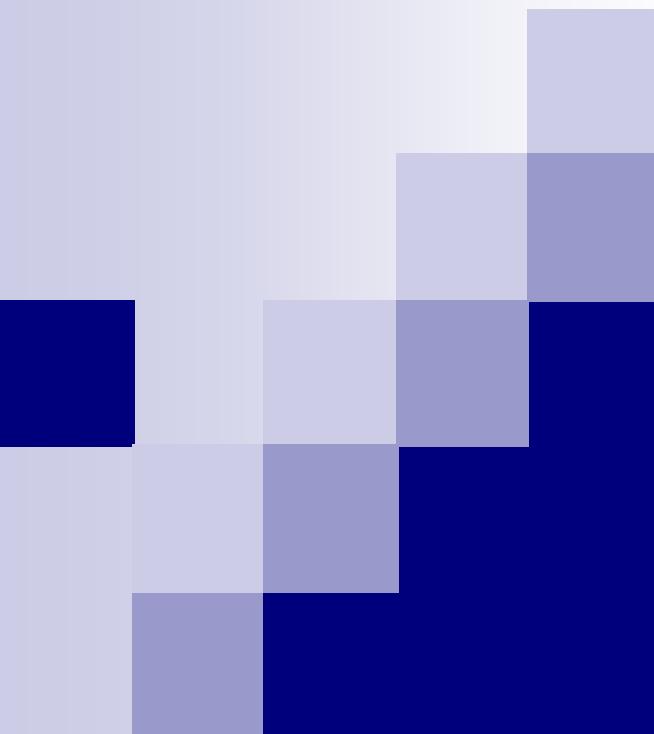

## NUCLEO-F401RE

Affordable and flexible platform to ease prototyping using a STM32F401RET6 microcontroller.
